

# Backend tesztelés Postman-nel

Készítette: Deák Levente, Stonawski Benjamin

## 1. Regisztráció

The screenshot shows the Postman application interface. At the top, there is a header bar with the method "POST" and the URL "https://api.hova-tovabb.hu/register". On the right side of the header bar are buttons for "Send" and a dropdown menu. Below the header, there are tabs for "Params", "Authorization", "Headers (9)", "Body", "Scripts", and "Settings". The "Body" tab is currently selected, indicated by a green dot. Under the "Body" tab, there are several options: "none", "form-data", "x-www-form-urlencoded", "raw" (which is selected), "binary", "GraphQL", and "J. <v>". To the right of these options is a "Beautify" button. Below these buttons is a code editor area containing a JSON object:

```
1  {
2    "felhasznalonev": "teszt",
3    "jelszo": "123",
4    "email": "teszt@jancsi.hu",
5    "teljes_nev": "Teszt Jancsi",
6    "kedv_id": 2
7 }
```

At the bottom of the Postman interface, there is a "Body" section with a dropdown menu set to "Pretty". To the right of this are buttons for "Raw", "Preview", and "JSON". Below these buttons is another code editor area showing the response body in JSON format:

```
1  {
2    "message": "Regisztráció sikeres"
3 }
```

## 2. Állomáskeresés

POST <https://api.hova-tovabb.hu/searchStation> Send

Params Authorization Headers (9) Body Scripts Settings Code Cook

none  form-data  x-www-form-urlencoded  raw  binary  GraphQL  J.

```
1 [{}]
2 ... "query": "Olcsvaapáti"
3 ]
```

Body ▾ Status: 200 OK Time: 339 ms Size: 1.57 KB [copy]
